## **Comprehensive Meta-Analysis is now available in 3 editions**

### **“Lite” edition**

- Work with a spreadsheet interface
- Work with odds ratios, risk ratios, risk differences, mean differences, standardized mean differences, and correlations
- Enter data for each study in its own format
- More than 30 data formats included
- Compute the treatment effect (or effect size) automatically
- Use ANOVA to assess the impact of moderator variables
- Create high-resolution forest plots in Black and White and export to Word

### **Standard edition**

- All features in Lite edition, plus:
- Create high-resolution forest plot in color for export to PowerPoint

### **Professional edition**

- All features in Standard edition, plus:
- Work also with hazard ratios, ratios of events by person years, risks in one group, mean in one group, generic effects sizes, and more
- Enter data for each study in its own format – more than 100 formats included
- Use meta-regression to assess the impact of continuous moderator variables, of continuous and/or categorical moderator variables, and interactions
- Use various mechanisms to assess the impact of publication bias
- Work with multiple independent subgroups within studies
- Work with multiple outcomes, time-points, or comparisons within studies.
