Comprehensive Meta Analysis is now available in 3 editions

Upgrades from Lite or Standard to Professional are priced at the software cost difference plus a \$20 convenience fee.

“Lite” edition

- Work with a spreadsheet interface
- Work with odds ratios, risk ratios, risk differences, mean differences, standardized mean differences, and correlations
- Enter data for each study in its own format
- More than 30 data formats included
- Compute the treatment effect (or effect size) automatically
- Use ANOVA to assess the impact of moderator variables
- Create high-resolution forest plots in Black and White and export to Word

Standard edition

- All features in Lite edition, plus:
- Create high-resolution forest plot in color for export to PowerPoint

Professional edition

- All features in Standard edition, plus:
- Work also with hazard ratios, ratios of events by person years, risks in one group, mean in one group, generic effects sizes, and more
- Enter data for each study in its own format – more than 100 formats included
- Use meta-regression to assess the impact of continuous moderator variables, of continuous and/or categorical moderator variables, and interactions
- Use various mechanisms to assess the impact of publication bias
- Work with multiple independent subgroups within studies
- Work with multiple outcomes, time-points, or comparisons within studies.

The student price only applies if all the following conditions are met:

- The user is a full-time student. User must provide a copy of his/her dated university ID or current semester schedule.
- The student is paying out-of-pocket, and will not be reimbursed by the university. If payment is made by the university (even if the funds are from an account in the student's name) the student price does not apply. The academic discount is available.
- The program can be installed on only one personal machine. Students are not permitted to share the software with other users or to load the program on university/employer computers. Refunds will not be issued after the program has been unlocked.
- Student orders being paid for by anyone other than the student will NOT be processed.
- Professors wishing to buy a license for their students MUST pay the academic price. Student orders received from professors will NOT be processed. Please see academic pricing.
- The student discount is available as a courtesy. Violation of the above terms will render the student ineligible for discounts on future orders.

The resident/fellow price only applies if all the following conditions are met:

- The user is a resident/fellow. User must provide a copy of his/her program acceptance letter.
- The resident/fellow is paying out-of-pocket, and will not be reimbursed by the university/employer. If payment is made by the university/employer the resident/fellow price does not apply. The academic discount is available.
- The program can be installed on only one machine. Refunds will not be issued after the program has been unlocked.
- Resident/fellow orders being paid for by anyone other than the resident/fellow will NOT be processed.
- Professors wishing to buy a license for their resident/fellow MUST pay the academic price. Resident/fellow orders received from professors will NOT be processed. Please see academic pricing.
